(54) Title: RECORD CARRIER

$$P = X^{14} + X^{12} + X^{11} + X^{10} + X^4 + X^3 + X^2 + 1$$

(57) Abstract: The present invention relates to a record carrier for storing information according to a standardized format. The record carrier comprising address information comprising address data bits indicating a position on the record carrier, the address data bits being arranged according to the standardized format, and error-protection parity bits for detecting errors in the address data. The error-protection parity bits deviate from the error-protection parity bits according to the standardized format. The invention further relates to a device for reading out the record carrier according to the invention.
